Insuring High Value Items

If you wish to insure any items with an *individual* value greater than £1,000.00 (GBP – Sterling) please provide a separate schedule listing these items, with full description, value for insurance purposes and where possible, proof of value. This information needs to be provided to the insurers in addition to the standard "European Inventory of Insurance" document that we have already provided to you.

It is your responsibility to ensure that the total value of the items listed on this separate schedule, are included within the total "Sum to be Insured" on the European Inventory of Insurance.

The insurers may request additional information on an ad hoc basis.
